Education

Master of Computer Applications (MCA)

International Institute of Management Science, Pune

2024 – 2026

SGPA: 7.20

Skills

- **Languages:** Java, C#, JavaScript, TypeScript, SQL
- **Frontend:** HTML, CSS, Bootstrap, Angular, AJAX
- **Backend:** Spring Boot, Hibernate, JPA, JDBC, Servlet, JSP, ASP.NET Core MVC, ASP.NET Core Web API, ADO.NET, Windows Forms, Entity Framework Core
- **Databases:** MySQL, SQL Server
- **Tools & Platforms:** Visual Studio, Eclipse, VS Code, Postman, Git, GitHub, Maven, Apache Tomcat
- **Concepts:** OOPs, REST APIs, CRUD Operations, MVC Architecture, Authentication & Authorization, SDLC, Dependency Injection

Experience

Software Trainee Intern

Feb 2026 – Present

CodNow Tech and Automation Solutions Pvt. Ltd.

- Developing desktop applications using Windows Forms and C#.
- Working on ASP.NET Core MVC applications with ADO.NET for database connectivity.
- Implementing CRUD operations, form validations, and SQL Server integration.
- Gaining practical experience in real-time software development and debugging.

Java Full Stack Developer – Industrial Trainee

Jan 2025 – Aug 2025

The Kiran Academy

- Engineered and deployed full-stack applications using Spring Boot, Hibernate, and SQL, implementing RESTful APIs for scalable, maintainable solutions.
- Integrated RESTful APIs and implemented user authentication.
- Enhanced practical knowledge of software development lifecycle, clean coding practices, and teamwork in a tech environment.

Projects

SamsTrack – Attendance Management System

Jan 2025 – Aug 2025

Spring Boot REST API — [GitHub](#) Angular Frontend — [GitHub](#)

- Developed a role-based attendance management system for Admin and Faculty.
- Built REST APIs using Spring Boot with layered architecture (Controller, Service, DAO).
- Created Angular frontend with reactive forms and REST API integration.
- Integrated Hibernate ORM with MySQL for CRUD operations and data persistence.

Technologies: Java, Spring Boot, Angular, Hibernate, MySQL, REST APIs

Student Management System – REST API

Aug 2025

ASP.NET Core Web API — [GitHub](#)

- Developed a RESTful Student Management API using ASP.NET Core following Controller–Service architecture.
- Implemented CRUD operations (Create, Read, Update, Delete) using HTTP methods.
- Integrated Entity Framework Core with MySQL for database persistence.
- Utilized dependency injection and attribute-based routing for clean and maintainable code.

Technologies: ASP.NET Core Web API, C#, Entity Framework Core, MySQL, Visual Studio, Postman

Certifications

- **Java Full Stack – The Kiran Academy** (Jan 2025 – Present)
- **Foundational C# with Microsoft – freeCodeCamp**
- **Java – HackerRank**
- **SQL – HackerRank**
- **Cloud Computing – NPTEL (2024), 60%, issued by IIT Kharagpur**
