Introduction to
Database Systems ()

Week 0 ()

Week 1 ()

☐ Introduction (unit?
unit=17&lesson=18)☐ Database Architecture
(unit?)

Week 1 : Assignment 1

The due date for submitting this assignment has passed.

Due on 2026-02-04, 23:59 IST.

As per our records you have not submitted this assignment.

1) The RDBMS stores data and meta-data separately.

0.5 points

- ☐ True
☐ False

No, the answer is incorrect.

Score: 0

Accepted Answers:

True

2) The *data type* of an attribute is not part of meta-data.

0.5 points

Week 10 ()

☐ True

☐ False

No, the answer is incorrect.

Score: 0

Accepted Answers:

False

3) A record can have a data element with an undefined type.

☐ True

☐ False

No, the answer is incorrect.

Score: 0

Accepted Answers:

False

4) An RDBMS can not manage more than one database.

☐ True

☐ False

No, the answer is incorrect.

Score: 0

Accepted Answers:

False

5) Schema is the description of the database.

☐ True

☐ False

No, the answer is incorrect.

Score: 0

Accepted Answers:

True

6) One must define the logical scheme of the database to design a database.

0.5 points

0.5 points

Session - Jan 2026 \(\)](#)

- ☐ True
☐ False

No, the answer is incorrect.

Score: 0

Accepted Answers:

True

7) A database system does not hide “the process of storing and maintaining the data on disks” from the users.

0.5 points

- ☐ True
☐ False

No, the answer is incorrect.

Score: 0

Accepted Answers:

False

8) The view level abstraction hides the database logical schema from the users.

0.5 points

- ☐ True
☐ False

No, the answer is incorrect.

Score: 0

Accepted Answers:

True

9) RDBMS can provide concurrent access to its users.

0.5 points

- ☐ True
☐ False

No, the answer is incorrect.

Score: 0

Accepted Answers:

True

10) A *log* is a record of all the database update operations.

0.5 points

- ☐ True
☐ False

No, the answer is incorrect.

Score: 0

Accepted Answers:

True

11) The recovery manager is responsible for bringing the database back into a consistent state when a failure occurs. **0.5 points**

- ☐ True
☐ False

No, the answer is incorrect.

Score: 0

Accepted Answers:

True

12) Recovery-manager may sometimes fail to bring the database back into a consistent state. **0.5 points**

- ☐ True
☐ False

No, the answer is incorrect.

Score: 0

Accepted Answers:

False

13) Which of the following is(are) typical database application(s)? **2 points**

- ☐ Credit card system
☐ Online reservation system
☐ Chat application system
☐ All of the above

No, the answer is incorrect.

Score: 0

Accepted Answers:

All of the above

14) _____ process stores copies of the database tables in several different locations simultaneously. Fill in the blank:

2 points

- ☐ Paging
- ☐ Query answering
- ☐ Buffering
- ☐ Replication

No, the answer is incorrect.

Score: 0

Accepted Answers:

Replication

15) Consider the statements given below:

2 points

S1: Conceptual level schema is derived from the Representational-level schema.

S2: Representational-level schema is derived from the Conceptual level schema.

Choose the correct option:

- ☐ S1: True; S2: False
- ☐ S1: True; S2: True
- ☐ S1: False; S2: True
- ☐ S1: False; S2: False

No, the answer is incorrect.

Score: 0

Accepted Answers:

S1: False; S2: True

16) Consider the statements given below:

2 points

S1: The *Logical Data Independence* allows us to modify the logical-level schema without affecting the view-level schema.

S2: The *Physical Data Independence* allows us to modify the physical-level schema without affecting the logical-level schema.

Choose the correct option:

- ☐ S1: True; S2: True

- ☐ S1: True; S2: False
- ☐ S1: False; S2: True
- ☐ S1: False; S2: False

No, the answer is incorrect.

Score: 0

Accepted Answers:

S1: True; S2: True

17) Which abstraction level of the database system describes how the data is actually stored ?

2 points

- ☐ Physical level
- ☐ Logical level
- ☐ View level
- ☐ None of the above

No, the answer is incorrect.

Score: 0

Accepted Answers:

Physical level

18) What is the most appropriate matching between the following sets:

2 points

S1: {a: ER Model; b: Relational Model}

S2: {p: Record-based model ; q: Conceptual level model; r: High-level data model;
s: Representational level model}

- ☐ a--p; b--q; a--r; b--s
- ☐ a--p; b--q; a--s; b--r
- ☐ a--q; b--p; a--r; b--s
- ☐ a--q; b--p; a--s; b--r

No, the answer is incorrect.

Score: 0

Accepted Answers:

a--q; b--p; a--r; b--s

19) Typically, a database administrator(DBA) is **NOT** responsible for:

2 points

- ☐ Authorizing access to the database
- ☐ Identifying database security breaches
- ☐ Populating the records
- ☐ To acquire required hardware and software resources

No, the answer is incorrect.

Score: 0

Accepted Answers:

Populating the records
